Axel Darren Suryanto is an Information Systems undergraduate and detail-oriented software engineer with experience in full-stack web and mobile development, cloud computing, and machine learning. Known for his problem-solving mindset and leadership in cross-functional teams, he has shipped production-grade applications across web and mobile using MERN, Next.js, Flutter, and Google Cloud Platform.

WORK EXPERIENCE

PT Transpacific Finance - Jakarta, Indonesia

Sep 2025 - Apr 2026

PT Transpacific Finance is an Indonesian multi-purpose financing and fund facilities provider.

Mobile Developer Intern

- Engineered and published a production-grade procurement mobile application to Google Play Store and Apple App Store, supporting 80+ internal users across procurement and operations
- Independently designed and built 15+ RESTful APIs handling procurement submission, multi-level approval workflows, and data management end-to-end
- Integrated backend APIs into the Flutter frontend with scalable state management, delivering a smooth, low-latency cross-platform experience on Android and iOS

Skilio - Singapore, Singapore

Sep 2025 - Oct 2025

Skilio is a SEA-based talent platform connecting Gen Z professionals to opportunities through skills-first hiring.

Quality Assurance Engineer Intern

- Executed 50+ UAT cases across mobile and web platforms, validating core features against defined business requirements
- Identified, documented, and reported 10+ functional and usability defects with clear reproduction steps to support developer resolution
- Performed regression testing prior to each release to verify bug fixes and confirm application stability
- Collaborated with product and engineering teams to improve release readiness and overall application quality.

PT Transpacific Finance - Jakarta, Indonesia

June 2025 - Sep 2025

PT Transpacific Finance is an Indonesian multi-purpose financing and fund facilities provider.

Software Engineer Intern

- Engineered a full-stack project management system (Next.js, Express.js, MySQL) end-to-end, owning the entire development lifecycle from database schema design to production deployment
- Built real-time time tracking and task management features for 15+ internal users, improving project visibility and cross-team collaboration
- Developed automated PDF and Excel reporting modules to support project monitoring and productivity analysis
- Integrated WebSocket-based real-time updates and deployed on internal servers, ensuring reliable low-latency access for the IT department

Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka - Jakarta, Indonesia

Sep 2024 - Jan 2025

Bangkit Academy is backed by Google, GoTo, Tokopedia, and Traveloka, develops top tech talent for Indonesia.

Cloud Engineer Intern - Cloud Computing Cohort 2024 Batch 2

- Selected for the competitive Company Capstone Track at Algo Network; led a 4-person team to build PRDiFY, an AI-powered PRD generation app using LLMs and Google Cloud
- Designed a microservice architecture with a Next.js frontend and Express.js backend on Cloud Run, with PRD documents in Google Cloud Storage and metadata in SQL
- Integrated and fine-tuned LLM pipelines (Claude API, OpenAPI) on Google Compute Engine using LangChain, delivering structured JSON outputs via prompt engineering
- Completed 32 courses across Dicoding (rated 4-5 stars) and Google Cloud Skill Boost covering Kubernetes, DevOps, Infrastructure, Logging & Monitoring, and Applied ML

PT Salam Pacific Indonesia Lines - Jakarta, Indonesia

July 2024 - Aug 2024

Salam Pacific Indonesia Lines (SPIL) is a leading container liner company in Indonesia

AI Engineer Intern - Team Leader

- Developed a prompt-engineered chatbot using Groq API and Gemini model for large-scale incident data processing, significantly improving speed and accuracy
- Led end-to-end development of an AI chatbot that automated incident reporting and analysis, integrating seamlessly with existing systems
- Built a Neural Network-based recruitment recommendation model, enabling data-driven hiring decisions
- Developed an AI-powered WhatsApp chatbot on Google Cloud Platform and Vertex AI to automate recruitment communications

Google Developer Student Club | Sampoerna University - Jakarta, Indonesia

May 2024 - Aug 2024

Google Developer Student Clubs (GDSC) are university clubs that help students learn and use Google Tech.

GDSC Core Team Member - Wordpress Developer Team Leader

- Co-led a 14-person team of frontend engineers and UI/UX designers to design and launch the BEM KM FOB Sampoerna University website
- Managed design-to-development handoff using Figma and WordPress, ensuring UX standards and project timeline were met

PT Salam Pacific Indonesia Lines - Jakarta, Indonesia

Salam Pacific Indonesia Lines (SPIL) is a leading container liner company in Indonesia

Software Developer Intern

May 2024 - June 2024

- Team Leader

- Led a 5-person intern team to deliver a driver recruitment web system in under 2 months, from requirements gathering through deployment
- Designed the full database architecture on Google Cloud Platform and integrated Google Drive for file attachment workflows
- Delivered two web applications: an admin portal for driver data management and a public-facing applicant portal

PROJECTS

- Hyve: Note-Taking App

Aug 2024 - Dec 2024

Full-Stack Software Engineer, [Website](#)

- Built a collaborative academic note-sharing platform using React.js, TailwindCSS, Node.js, and MongoDB, with secure OAuth authentication and gamification features (points, leaderboards)
 - Deployed frontend on Vercel and backend on Heroku; delivered on time within a 5-person cross-functional team
- Skin Cancer Detection App

Nov 2024

Cloud Engineer, [Repository](#)

- Developed a cloud-native ML-based skin detection app on Google Compute Engine and Firestore, exposed via a secure RESTful API
 - Conducted QA testing with Postman across all endpoints and monitored deployment performance for stability under load
- Online Bookstore Database System

May 2024

Database Developer, [Report](#)

- Designed a normalized MySQL database with user authentication, shopping cart, order processing, and an admin inventory management interface
- Password Manager Management System Project

May 2024

C++ Software Engineer, [Repository](#)

- Built a C++ password manager with Caesar Cipher encryption, master password authentication, and full CRUD operations using linked lists and classes

EDUCATION

- University of Arizona - Jakarta, Indonesia

2024 - 2026

Bachelor of Applied Computing, Information System, 4.00/4.00
- Sampoerna University - Jakarta, Indonesia

2022 - 2026

Sarjana Sistem Informasi, Sistem Informasi, 3.9/4.00

COURSES

- IBM

Jan - June 2023

IBM DevOps, Cloud, and Agile Foundations

- Developed foundational knowledge in DevOps culture and tooling, Cloud Computing models and infrastructure, and Agile/Scrum methodology including sprint planning and user stories

Additional

Programming Languages: HTML, CSS, JavaScript, C, C++, Java, Python
Web Technologies: MERN Stack, Next.js, WordPress, React.js, Node.js
Cloud Platforms: Google Cloud Platform (GCP), Firebase
Databases: MySQL, PostgreSQL
Other Tools: Visual Studio Code, GitHub, Figma, Trello, Microsoft Office
